

# DUCATI Keyswitch KEY 5000 / KEY 5005

## ■ Wired Key Switches: KEY 5000 / KEY 5005 / KEY 5005 INOX

Connect connectors 1 & 2 to the START normally open contact of any DUCATI electronic board to command a full cycle maneuver (both wings will operate a full cycle, or in case of single wing gate use, the single gate will operate a full cycle). There's no polarity to be respected.

Connect connectors 1 & 2 to the PEDESTRIAN START normally open contact of a DUCATI electronic board to command a partial pedestrian maneuver (only 1 wing will partially open to permit pedestrian access only) There's no polarity to be respected.

You can wire as many desired additional key switches or any additional different button to operate your gate opener, you can use any device with a clean N.O (normally open) bistable contact, wire them in parallel. For extra safety it is advisable to wall up the wiring cables.
